Reasons for Allowance

1. Claims 1, 3-11, 13-19 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited art taken alone or in combination fails to teach the claims invention of purging a data base, related to a natural language constraint satisfaction problem, of nogoods involves representing a plurality of contexted disjunctions conjoined to form a conjunction of such disjunctions, and refining such disjunctions until such disjunctions are backtrack-free or the result of the conjunction of such disjunctions evaluated to false.

The closest prior art (Christianson et al, USPN 6,102,969) teaches a method and system using information written in a wrapper description language to execute query on a network wherein Christianson further teaches listing information sources according to relevance. Christianson does not teach information sources having variables whose expression only holds true in a given context or, Christianson does not teach contexted disjunctions, related operations and nogood databases.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
